Simplify full body imaging and patient positioning.

Featuring convenient top slide and the tallest table height in our portfolio, the 3502 EZ Slide is designed with the surgical team in mind. Imaging and surgical access is easy with 21” of top slide, allowing for movement of the patient through the imaging window with just the click of a button. Also featuring our tallest table height, the 3502 EZ Slide provides comfortable waist-height access, minimizing the physical strain placed on the surgical team.

**IMAGING EFFICIENCY**
With 21” of top slide, the 3502 EZ Slide makes full body imaging convenient. A simple click of a button effortlessly moves the patient toward the C-arm, eliminating the need for risky repositioning. The table also features a slim profile base that stays clear of mobile imaging equipment.

**SURGICAL POSITIONING FLEXIBILITY**
Skytron makes positioning and setup a breeze with a removable leg section that can quickly integrate with accessories such as the optional 40” carbon fiber extension. Sturdy, standardized side rails accept most table accessories and preprogrammed positioning options allow for one-touch maneuvers at any point throughout the procedure.

**IMPROVED PATIENT SAFETY**
The 3502 EZ Slide takes the confusion out of weight limits. Skytron can provide top slide at full weight capacity, which means the 3502 EZ Slide will support articulation capacities up to 600 pounds – even while sliding the patient through the imaging window.
21" TOP SLIDE, GENERAL PURPOSE TABLE

Providing 21" of top slide, the 3502 EZ Slide takes the work out of imaging setup. At the click of a button, the patient is moved through the expansive imaging window.

DIFFERENTIATING FEATURES

- 21" top slide
- 7 5/8" slide to head and 13 1/8" slide to foot
- 700 lb lift and 600 lb articulation weight capacity
- Removable leg section for quick accessory attachment and positioning
- Durable stainless steel base is easy to clean
- 26"- 44 7/8" adjustable table height
- 20° lateral tilt
- 25° Trendelenburg and 20° reverse Trendelenburg
Skytron makes top slide easy for patients of diverse sizes. The 3502 EZ Slide will offer 21” of top slide at its full articulation weight capacity. Also designed to give comfortable, waist-height access to taller surgeons, the table offers our maximum table height of 44 7/8”. As the table top slides toward the foot end, the head section can be conveniently detached and applied as a foot extension. This thoughtful design is complemented with a radiolucent top and a removable leg section that allows for quick attachment of the 40” carbon fiber extension so that any operating room can achieve improved imaging without the worry of reduced weight limits.

The 3502 EZ Slide also brings confidence to the operating room. Recognized for their reliable performance, Skytron surgical tables are consistently rated as having a lower cost of ownership.
One-touch positioning functions include Trendelenburg, tilt and more.

Battery life/diagnostic indicator

Easy to use clip style power cord

Back-up controls for emergency situations

Optional 40° carbon fiber leg section for upper and lower body imaging

Self-leveling brakes for stability on uneven floors

---

**ONE-TOUCH PENDANT CONTROL**

- Simple one-touch operation
- Backlit control for high visibility in low lighting
- Audible alarm for kidney bridge, back up articulation and top slide obstruction
- Anatomically correct return-to-level
- Recessed buttons prevent accidental activation
- Durable and water resistant
- Can be used in conjunction with optional three function foot control

90° Back Up  40° Back Down  25° Trendelenburg  20° Reverse Trendelenburg  20° Tilt - Left  20° Tilt - Right
Positioning Guide
**3502 EZ SLIDE**

Full function, electrohydraulic battery powered surgical table features 21" longitudinal top slide, 700 lb lift and 600 lb articulation capacity. Table is equipped with a removable 15' power cord for battery charging and removable leg section for accessory attachment. Safety features include four conductive casters, four-point braking system with push button operation and manual override. Handheld, backlit pendant control includes steel housing and provides extreme durability. Pendant permits control at any point around the table’s perimeter.
