Arm Support
Skytron offers a wide variety of arm support accessories including four unique standard options. Our best selling arm support, the Premium Armboard, features a cast aluminum and steel construction that will outlast any competitive support. Nurses love our easy to use oversized release handle, making it easier than ever to attach or remove. We also offer complete parts support in the unlikely event you’ll need a repair.
Arm Support - Armboards

Consider using the 6-010-58 Softee Strap with any of your armboards. Pads for Skytron armboards are available in 2 through 5 inch sizes.

Arm Support - Armboards

Skytron imaging table tops and carbon fiber extensions have a unique mounting surface. These armboards are designed to be compatible with the 40" carbon fiber extension or Skytron’s 3000 series of tables and offer fingertip to fingertip imaging.

Pivoting Carbon Fiber Armboard

Carbon Fiber Armboard
P/N 2-060-05
Arm Support - Arm and Hand Surgery Boards

Skytron offers two great options for arm and hand surgery. The Carbon Fiber Arm Surgery Board attaches directly to a 40" carbon fiber extension or a 3000 series table top to provide uninterrupted imaging. The Carter Arm Surgery Board offers more set up options than any other on the market with its adjustable length and angle settings. Other compatible pieces include a support rod and traction arm.

X* Requires 6" Clamp-on Rail (6-070-07)
X** Requires 40" Carbon Fiber Extension (4-030-40)
X† Requires Head End Uro Tray Bracket, not compatible with 3603
X‡‡ Requires Pediatric Table Extension (4-030-42)
Body Support
Compliment your Skytron surgical table with only the best accessories, thereby bringing greater positioning and functionality into your OR. Our vast selection of accessories and positioning devices address a broad spectrum of clinical needs. When the right accessories are combined with your surgical table, your OR will be equipped to handle any procedure safely and reliably.

Beach Chair Simplified Shoulder Surgery Positioning
With our Lift Assist and Double Ball Joint Beach Chair, Skytron offers two simple and efficient set-ups for shoulder surgeries. Both chairs quickly attach to the table and offer comfortable support of the patient’s head and back during shoulder manipulations. When used with a top rotation surgical table, the chair can be positioned over the narrowest section of the base, thereby providing the surgical team plenty of foot room during shoulder procedures.

Skytron Beach Chair
P/N 3-040-32

EZ-Lift Assist Beach Chair
P/N 3-040-30

The Double Ball Joint allows for extreme range of motion.

10” Foot Extension
P/N 4-030-13

Lateral Brace for Shoulder Positioner
P/N 3-010-04
Body Support - Side Extensions

Skytron offers multiple side extension options to satisfy your bariatric needs. Creating a wider table top is easy using Skytron’s side extension options. A spring loaded clamp makes installation and removal quick and easy.

5” Side Extensions
As a market leader in surgical table weight capacity, Skytron also offers side extensions that widen the surface for bariatric cases. These extensions can be easily attached and offer sturdy support. The Skytron 5” Table Side Extension has specific cutouts in its frame to sit over the table side rail standoffs, making any movement of the extension impossible. Unlike any other side extension, the Skytron 5” extension will remain locked and secure even with the attachment of stirrups.

Body Support - Foam Positioners

Using Skytron foam positioners will save you plenty of set up time, allow for easier patient repositioning and add safety to your OR.

**Singer Starr Stacker Lateral Support System**

The Singer Starr Stacker is the most innovative, cost-effective and safe solution available for lateral patient positioning. Comprised of stackable arm and leg contoured cushions with a special armboard, the system independently supports upper and lower extremities. The Stacker system is specifically designed to reduce pressure sores, minimize patient positioning time and provide continuous access to vascular lines and monitoring devices. The Singer Starr Stacker Lateral Support System is ideal for open, minimally invasive and robotic lateral procedures.

Leg Support

Skytron provides a variety of choices for patient leg support and positioning. Split leg accessories provide surgical access that is otherwise difficult to achieve with a standard leg section. For lithotomy positioning, Skytron offers easily articulated stirrups and transfer boards that are a lightweight solution for leg support during intubation.

The 5 Piece Heavy Duty Split Leg is designed for exceptional bariatric support. Capable of positioning the patient to extremely low levels, the Heavy Duty Split Leg provides best in class access for the surgeon. This system can support up to a 600 lb. patient on the 3600 series table and offers the integrated pelvic tilt seat to help keep the patient in place without relying entirely on nerve damaging straps.
Leg Support - Ortho Trax

Skytron brings flexible positioning and imaging accessibility to orthopedic surgery. Our systems are uniquely designed for lower extremity and hip procedures and can be attached to any Skytron general purpose top slide surgical table. Constructed with carbon fiber leg spars, this system is ideal for use with imaging equipment and can easily be adjusted according to patient size and positioning requirements.

X†† Requires Pediatric Table Extension (4-030-42)
Leg Support - Transfer Boards

Skytron offers various lightweight solutions like transfer boards. It is not just a lighter leg section; it is a purpose built accessory designed to work with other Skytron lithotomy accessories. The transfer boards are longer so that the patient can be positioned on the seat section from the beginning of the case, and will not need repositioning for stirrups.

Leg Support - Leg Positioners
Skytron’s FlexFit 600 stirrups set a new standard for patient positioning in your operating room. Built to handle a higher weight capacity while allowing simple leg repositioning, these stirrups are designed with both the patient and the surgical team in mind.

When you combine Skytron’s class leading table top slide or the market’s only 210° table top rotation with high quality Skytron accessories, you get great imaging windows, high weight capacities and durability. Skytron tables and accessories give you great urology options regardless of which Skytron table you are using.

MDM19 - Urology/Head Support Matrix
Clamps

Skytron offers a wide variety of clamps for a wide variety of applications. Whether you need to clamp round or flat bar accessories, add a side rail to your various extensions, or upgrade from your old “Clark Socket” style clamps, Skytron has you covered.

Schure Socket
P/N 6-040-11

Spring Loc Clamp
P/N 4-090-15

Schure Socket XL and Spring Loc Clamps will give peace of mind that accessories attached to the surgical table will remain secure throughout the duration of the procedure. Both flat and round accessories can be placed inside the Schure Socket clamp and then fastened tightly to the table’s side rail. The Spring Loc Clamp offers a low-profile solution for flat bar accessories. Specialized side rail cutouts are not required and the clamps can be simply attached or removed with only one hand.

Universal Side-Rail Clamp II
P/N 6-040-12

EZ Grip Bar Clamp
P/N 6-030-05-1

Bar Clamp - Standard
P/N 6-030-01

Standard Bar Clamp
P/N 6-040-10

6” Clamp-On Rail

Tri-Clamp
P/N 6-040-03
Extensions

Skytron designs tables with easy access to imaging. With low profile bases and 210° of top rotation on certain table models, clinicians are provided with exceptional imaging capabilities. These features, combined with extensions like the 40" carbon fiber extension and pediatric extensions maximize the imaging potential for Skytron tables.

**Carbon Fiber Extension**
P/N 4-030-40

**Pediatric Table Extension**

Table Pads

Designed for pressure management, Skytron pads are made with a high-density base foam and a top layer of soft cradling Visco Memory foam for added comfort and compatibility. Skytron Table Pads also feature welded leak-proof seams for added durability and better performance. Choose your thickness and rest assured that you are getting the best quality pads at a great value. We even have bariatric sizes.

The Welded Seam Pad utilizes adhesive and heat. Together this "welds" the seams shut, preventing liquids from entering into the inner foam layers. Key features of the new pad are 1 inch of Viscoelastic Memory Foam, Antimicrobial treatment, Fusion Synergy conductive coating, Welded Seams, and 4-way stretch material.

Each Welded Seam Pad has a vent located on the side of the pad. This vent allows air to enter or leave the pad while preventing fluid ingress so that foam can expand and contract.

Top Cover: Fusion Synergy Conductive Urethane Coating
1" (25.4mm) Viscoelastic
1-1/2" (38.1mm) Foam
1/2" (25.4mm) Closed Cell Foam

Bottom Cover: Fusion Synergy Conductive Urethane Coating

The exterior of Welded Seam Pads are treated with Triclosan, an antimicrobial agent.

Welded Pad with "welded" seams

See the Table Accessories Matrix to find Part Numbers and determine which pad set is needed for individual Skytron tables.

3" Welded Seam Pad shown.
General Accessories
Compliment your Skytron surgical table with only the best accessories, thereby bringing greater positioning and functionality into your OR. Our vast selection of accessories and positioning devices address a broad spectrum of clinical needs. When the right accessories are combined with your Skytron table, your OR will be equipped to handle nearly any procedure.

Skytron accessory carts will help protect your investment and make storage easier. These accessory carts are made with a strong anodized aluminum frame, tough conductive casters and edge guards. They are designed to hold not only Skytron accessories but the removable sections from a Skytron table. Carts are available with multiple kits for holding Carbon Fiber Extensions, Split Legs, Stirrups and many other options.
